SUMMARY

Full Stack Developer with experience building web systems in production, from requirements gathering to deployment. Currently develops the systems of Livreria - Magna Opera, including the company's ERP. Previously delivered two systems on .gov.br domains for the São Manoel do Paraná City Hall. Works mainly with TypeScript, React, Node.js and relational databases, is building a React Native mobile app as his final undergraduate project, and structures his own development process around specification, verification and AI-assisted testing.

PROFESSIONAL EXPERIENCE

Full Stack Developer
09/2026 – Present

Livreria - Magna Opera · Remote

- Development and maintenance of the company's systems, including the ERP, from requirements analysis to production delivery.
- Designed a personal engineering workflow for completing tasks: specification and execution with GSD, a verification agent that checks scope and business-rule compliance (with optional security review), manual test script generation and final validation.
- Development of features, with and without AI, to streamline internal processes and team performance.
- Optimized MySQL queries (latency and redundant queries) and fixed production errors identified through Sentry.
- Prototyped screens with AI (Claude Artifacts), validated them with management and adjusted layouts to improve the system's day-to-day usability.
- Development of ERP integrations with AI-powered automation workflows in n8n.

Technologies: Next.js, Node.js, MySQL, Docker, Sentry, Linear, n8n

Full Stack Developer Intern
09/2025 – 09/2026

São Manoel do Paraná City Hall · On-site

Two web systems deployed to production, with requirements gathered directly from public administration departments.

AVALIE · avalie.saomanoeldoparana.pr.gov.br

- Platform for rating municipal public services, with citizen-facing forms and a metrics dashboard.
- Two-layer AI pipeline with Groq API: real-time comment moderation and batch summaries with sentiment analysis.
- Layered REST API (router, controller, service, repository) with automated tests and personal data handling compliant with LGPD (Brazil's data protection law). Project approved by the municipal administration.

Technologies: React, TypeScript, Tailwind CSS, Node.js, Express, Prisma, PostgreSQL, Supabase, Jest, Supertest, Groq API

Parque das Orquídeas Cemetery · cemiterio.saomanoeldoparana.pr.gov.br

- System that replaced paper-based records and centralizes the registration, lookup and updating of more than 840 records.
- Interactive 2D map based on the cemetery's real physical layout, helping visitors locate graves.
- Public transparency portal for residents, with JWT authentication and bot protection via Cloudflare Turnstile.

Technologies: React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Supabase, JWT, Leaflet, Mailgun, Cloudflare Turnstile

Technical Support – Civil Engineering
05/2025 – 09/2025

São Manoel do Paraná City Hall · On-site

Technical support for the civil engineering team and assistance with administrative processes.

PROJECTS

Finova (final undergraduate project, in progress)

Mobile app for personal and couple expense management: transactions, reports, category spending limits with usage alerts, and WhatsApp-linked accounts.

- Requirements, business rules and architecture decisions specified before coding (spec-driven), with traceability to the implementation.
- Business rules in a pure domain layer, isolated from persistence through repositories; 115 automated tests and CI with typecheck, lint and tests.

Technologies: React Native, Expo, TypeScript, Jest, Testing Library, ESLint, GitHub Actions

AI Book Cover Generator (technical assessment)

Web application that generates book covers from a title and genre, using an AI agent that combines text and image models.

Technologies: Nuxt, Vue 3, TypeScript, Node.js, OpenRouter API, WaveSpeed API

EDUCATION

Associate Degree in Systems Analysis and Development — **UMFG, Cianorte** 01/2025 – 07/2027 (expected)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL · **Databases:** PostgreSQL, MySQL · **Testing:** Jest, Testing Library, Supertest, Postman
Frontend and mobile: React, Next.js, Vue 3, Nuxt, React Native, Expo, HTML, CSS, Tailwind CSS
Backend: Node.js, Express, REST APIs, Prisma, JWT
Infrastructure and tools: Docker, Supabase, Vercel, Render, Cloudflare, Sentry, Git, GitHub Actions, Linear
AI and automation: Groq API, OpenRouter API, n8n, spec-driven development (GSD), building AI skills and agents

LANGUAGES

Portuguese (native) · **English** (advanced, C1) · **French** (basic, A2)
